

GRAIN CUT YET?

HOURS ARE DOLLARS NOW

You can't afford to let the hot sun beat down upon your grain, drying and shattering it up and shelling it out after that "just right" period has been passed in its ripening stage. Don't wait for someone else's binder to harvest your grain but buy a

MCCORMICK BINDER

and cut it when the berry is soft—weighs the most—contains the most nutrition—and will bring you the highest price. That is the way to make the most money out of your grain crop and the money that you will save in one season will almost, if not entirely, pay for a McCormick. The McCormick has a wide range of reel adjustment; the knotter is simple and ties a perfect knot; grain of any length can be elevated without threshing off the heads; all levers are conveniently placed; the McCormick is light of draft, extremely strong and durable, yet marvelously simple when compared with other binders.
